#Release 04.2023

The preset files are available for:

- ASHLY FX Series Amplifier

The settings are available as a library file "Pan Acoustics GmbH 1.0_2023_04.zcl"

The speaker settings are protected, a customizing is not possible.

The files can be loaded via the web front end of the ASHLY FX Amps.

All voicings, with exception of subwoofers, are full-range versions. If the loudspeaker is operated with a subwoofer a separate HighPass-Filter @ 114 Hz Butterworth 24dB/Oct is recommended.

The screenshot displays the ASHLY FX Amps web interface. On the left is a dark sidebar with the ASHLY logo and a menu of settings: Dashboard, Input, Zone, Output, Settings (highlighted in red), System Information, Device, Backup & Restore, Speaker Library (highlighted in red), Power Management, GPIO, LAN, and WIFI. The main content area is titled "Speaker Library" and shows the loaded library file "Pan Acoustics GmbH 1.0_2023_04". It lists three categories of speakers, each with a list of specific models and a speaker icon:

- Pan Speaker**
 - Pan Speaker P 01-Pi
 - Pan Speaker P 02-Pi
 - Pan Speaker P 04-Pi
 - Pan Speaker P 08-Pi
 - Pan Speaker P 8-15-Pi
- Pan AMT**
 - Pan AMT P 04-AMT
 - Pan AMT P 12-AMT
 - Pan AMT P 261-AMT Event
 - Pan AMT P-261-AMT Cine
- Pan Subwoofer**
 - Pan Subwoofer P SW-108
 - Pan Subwoofer P SW-208
 - Pan Subwoofer P SW-112
 - Pan Subwoofer P SW-118

At the bottom right of the main area are three buttons: "CREATE...", "EDIT...", and "IMPORT..."
